Assignment 1-2

1. what are Tags?

Tags are the labels used to mark the start and end of an HTML element. They are enclosed in angle brackets.

2. what are Elements?

An Element is the complete unit, consisting of the opening tag, the content inside, and the closing tag.

3. what is Block - level?

Block-level elements always start on a new line and take up the width available.

Ex: , <h1> to <h6>, <P>

4) what is 'inline'?

Inline elements do not start on a new line. They only take up as much width

necessary for their content.

5. Tag categories?

* Formatting Tags :- used to style text
* Interactive Tags :- Allow user interaction
* Media Tags :- used to embed multimedia

6. Semantic vs Non-semantic Tags

* Semantic Tags :- These tags clearly describe their meaning to both the browser and the developer.
* Non-semantic Tags :- These tell us nothing about their content.

7. Closing and Self-Closing tags :-

* Closing Tags :- Most tags come in pairs and require a closing tag to wrap content.
* Self-Closing Tags : Some tags don't wrap content and don't need a separate closing tag.
